

Our Current Healthcare "System"

IT'S A MESS!

As you can see, our current healthcare "system" is **extremely inefficient!** It wastes money and puts **profits over patients.** **Plus, it doesn't even work!** Millions of Americans don't have insurance and millions more can't afford healthcare costs.

Single Payer Universal Healthcare

it's just better!

How does single payer healthcare work?

- 1 Businesses and residents pay affordable premiums to the government.
- 2 The government funds a public health insurance plan which reimburses doctors & hospitals for care provided.
- 3 Everyone is covered. **Period.**
It's that simple.

by the numbers

63 million

Americans are either **uninsured** or **underinsured**, meaning they struggle to pay premiums & deductibles.

With single payer, **all Americans will be covered.** No one will suffer because they cannot afford their medical bills.

95%

of American households will pay less for **healthcare** under a single payer universal healthcare system than they do now because they will have **no deductibles or copayments.**

Let's clean up the **MESS** of a healthcare "system" that we have.

The **Expanded and Improved Medicare for All Act** (H.R. 676) is a single payer bill that will bring affordable healthcare to all Americans. Urge your representatives to sign on.
