

# Our Current Healthcare "System"

IT'S A MESS!

As you can see, our current healthcare "system" is **extremely inefficient!** It wastes money and puts **profits over patients.** **Plus, it doesn't even work!** Millions of Americans don't have insurance and millions more can't afford healthcare costs.

## Single Payer Universal Healthcare

*it's just better!*

### How does single payer healthcare work?

- 1 Businesses and residents pay affordable premiums to the government.
- 2 The government funds a public health insurance plan which reimburses doctors & hospitals for care provided.
- 3 Everyone is covered. Period. **It's that simple.**

by the numbers

3 out of 10

New Yorkers are either **uninsured** or **underinsured**, meaning they struggle to pay premiums & deductibles.

With single payer, **all New Yorkers will be covered.** No one will suffer because they cannot afford their medical bills.

98%

**of households in New York State will pay less for healthcare** under a single payer universal healthcare system than they do now because they will have **no deductibles or copayments.**

Let's clean up the **MESS** of a healthcare "system" that we have.

The **New York Health Act** is a single payer bill for NY State that will bring affordable healthcare to all New Yorkers. Urge your representatives to sign on.
